

Seoul International Digestive Disease Symposium 2024

In Conjunction with the Annual Meeting of the Korean Society of Gastroenterology

April 20-21, 2024
Grand Walkerhill Seoul, Korea

"Pioneering the future of digestive diseases"

SIDDS 2024

Name	Soon Kyu Lee
Affiliation	Incheon St. Mary's Hospital, The Catholic University of Korea, Seoul
Country	Republic of Korea
Major Field	Liver transplantation, Hepatocellular carcinoma, Gut microbiome

Educational Background	
2017.03-2022.08	Ph.D in Internal Medicine Catholic University of Korea, Seoul, Korea
2013.03-2016.02	M.S. in Internal Medicine Catholic University of Korea, Seoul, Korea
2005.03-2011.02	B.S. in Medical Science Catholic University of Korea, Seoul, Korea

Professional Experience	
2023-Present	Assistant Professor Department of Internal Medicine, Catholic University of Korea, Seoul, Korea
2021-2022	Clinical Assistant Professor Department of Internal Medicine, Catholic University of Korea, Seoul, Korea
2019-2020	Clinical Fellow Department of Internal Medicine, Catholic University of Korea, Seoul, Korea

Main Scientific Publications
1. HBeAg-Positive Grey-Zone Patients: Treatment Beyond Guideline?, Clinical and Molecular Hepatology (2023) 29(3): 825-827.
2. An Immunological Perspective on the Mechanism of Drug Induced Liver Injury: Focused on Drugs for Treatment of Hepatocellular Carcinoma and Liver Transplantation, International Journal of Molecular Sciences (2023) 24(5), 5002
3. Autoimmune liver disease represented as PBC after SARS-CoV-2 infection: A need for population-based cohort study, Clinical and Molecular Hepatology (2022), 28:926-928
4. A decrease in functional microbiomes represented as Faecalibacterium affects immune homeostasis in long-term stable liver transplant patients, Gut microbes (2022), 14:1, 2102885
5. Immune-mediated liver injury represented as overlap syndrome after SARS-CoV-2 vaccination, Journal of Hepatology (2022), 77:1207-1230
6. Patient-derived Avatar Mouse Model to Predict the Liver Immune Homeostasis of Long-term Stable Liver Transplant Patients, Frontiers in Immunology (2022), 13:817006
7. Reactivation of resolved hepatitis B after daratumumab for multiple myeloma, Clinical infectious diseases (2021), Sep 15;73(6):e1372-e1375
8. Combination treatment with metformin and tacrolimus improves systemic immune cellular homeostasis by modulating Treg and Th17 imbalance, Frontiers in Immunology (2021), Jan 8;11:581728
9. Sorafenib for Advanced Hepatocellular Carcinoma Provides Better Prognosis after Liver
